DETAILED ACTION

1. Claims 1-14 are allowed over the art of record.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-14 recite, inter alia, an apparatus and a method for implementing very high density signal probing of a printed circuit board having a pad pattern connected to signals of interest, said apparatus comprising: at least one power/ground module; each said power/ground module inserted within a selected one of said through holes; each said power/ground module containing a high dielectric constant material between an outer conductor and a center conductor defining a capacitor; said capacitor providing a low impedance path between said metal plate and a power or ground pad of the printed circuit board.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh N. Tang whose telephone number is (571) 272-1971. The examiner can normally be reached on M-F (7:00-3:30).
